EQUITY MARKET UPDATE & UNIT TRUST POSITIONING

- Resources:** We continue to have a bias towards the large diversified and high-quality mining companies, as they are typically low-cost producers with diversified income streams across various commodities and geographies. We also hold selected single-commodity shares in businesses that we believe have a competitive position in their respective industries.
- Industrials:** We have reduced exposure to a few of the domestic consumer industrials as they have now reached full value. With the proceeds, we have slightly increased exposure to selected, high-quality and better-value rand-hedge industrial shares. We have also purchased some great quality mid- and small-cap local industrial businesses that are trading at attractive valuations.
- Financials:** Based on our company valuations, we retain our preference for selected banks and assurers where we continue to believe that more upside potential exists in their restructuring initiatives.
